Supply of EN590/D6/JETA1/LNG

**Dear Final Seller ,**

We, at SierraTurks International Holding Group (**FINAL BUYER**), represented by Dr. Şeref TUFAN ( Owner ) have been following the Refineries' progress in the field of Fuel Supply, and We are truly impressed by the achievement in efficiency, consistency and commitment to Buyers.

SierraTurks International Holding Group has been a leader in the International Trade Industry for the past 25 years, providing efficient services to its Trade partners with Academically rigid and internationally strict Trade Rules, offering our End Buyers peace of mind. Led by high caliber academics and professional Business Experts, SierraTurks International Holding Group excel core competencies characterized by constant innovation and improvement of product offerings.

We believe that a partnership between our companies could be mutually beneficial, specifically, we are interested in exploring a collaboration in Fuel Supply to our Buyers, and we believe that such partnership in market penetration, co-marketing efforts can be beneficial to both parties.

We believe this collaboration could offer several advantages to your company, including, but not limited to customer base, market insights, increased market reach and visibility through joint marketing and sales efforts, potential for cost savings through shared resources and economies of scale.

Included herewith a list of our confirmed contracts with our End Buyers and the quantity required, hoping to establish a Ten-Year (10) contract to supply the proposed Products **EN590/D6/JetA1/LNG.**

We are only working with vendors who accept the buyer purchasing procedure written in the waist. Our fuel amounts we want are very serious. For this reason, unfortunately we do not read the line we do not accept the seller procedures. If you accept the conditions we want, let's continue the negotiation. If the fuel prices we want to offer are less for you, you can make advice to increase. If you don't accept them, we wish you good luck.

To move forward, I propose we arrange a preliminary meeting or call to discuss this potential collaboration in more detail. During this meeting, we can outline our objectives, expectations, and explore how we can effectively align our efforts. We are flexible with timings and can adjust to your schedule to ensure a productive initial discussion.

We are supplying to government administrations, and unfortunately we can do business with sellers who accept our determined and approved receiver procedures.

Perhaps your procedures may be very safe, but we are forbidden to buy fuel other than our procedures.

We sell these fuels to the energy ministries of international governments. In other words, they purchase from us through a tender. According to the purchased tender, 20 different groups will come every month, with 10 of them arriving at the ports in the morning and the other 10 in the afternoon. The managers representing these groups will see the fuels in the tank farm with their own eyes and will conduct physical inspections every month. For 120 months, 20 groups will inspect the fuels within 10 days each month, both in the morning and afternoon. Now, what I need from you is to recommend the procedure that allows us to conduct these visits according to the protocols. These groups will come to the ports for verification and will report the existence of the fuels to their respective energy ministries and to me. These groups should not encounter any problems at the port and terminal entrances. They should not face any secret payments or expenses in any way. Their only task is to see the fuels and provide a verification report.

After this verification is completed, the same groups will organize their SGS teams and will return to the port for a dip test. So, the first phase is the physical verification of the fuels, and the second phase is to conduct a dip test on the fuels. They will not incur any extra costs or payments for these two processes.

What you need to remember here is that our technical team must not encounter any problems during the physical verification and SGS stages. There should be no obstacles whatsoever. They must provide unconditional and unlimited access.

The part that concerns me is that the original POP documents must be notarized and sent to me via DHL to our address. They must also send the same documents only to my email address. When we receive the original documents, I will issue a bank payment order, and the funds will be transferred to the seller's refinery bank accounts via MT 103 after the documents are regularly delivered to us.

**We accept your invoice, but we can always pay your payments within 20 working days after the test is completed. There should be zero obstacles and zero conditions between us and the fuel.**

We apologize.

I trust the above is in order and await your kind response at your earliest convenience
