

Butyl Waterstop for Concrete

Butyl waterstop for concrete is a high-performance waterproof material specifically designed for concrete structures, primarily used to control moisture penetration and ensure the sealing of concrete joints. Its main component is butyl rubber, which has excellent elasticity and durability.

Specifications

- Material: Butyl rubber
- Color: Black
- Thickness: 20 mm, 25 mm, 30 mm, 32 mm, 42 mm, Custom
- Length: 5 m, 10 m, 15 m, 20 m, 38 m, 48 m, Custom
- Operating temperature: -30 ° F to 200 ° F

Features

- No drying required, saves time
- Low temperature resistant, moisture resistant
- Self-adhesive application, easy to install, no special treatment required
- Solvent-free, non-toxic, non-polluting
- Excellent sealing performance, durable, long service life
- Aging resistant, non-shrinking, non-hardening, non-oxidizing

Applications

- Precast concrete wall panel systems
- Sanitary and storm sewer manholes
- Underground utility vaults
- Utility vaults, portable water tanks and box culverts
- Pipes (round, oval, flat-base elliptical and arch types)
- Wet wells
